

## COMPANY PROFILE

Aspiring to be your competent system provider for machine vision and robotics, we offer solutions that include smart cameras, computer-based vision systems, accurate robots, and even integrated test installations that allow for highly flexible handling.

Our interdisciplinary and interconnected engineering knowledge about automation, image processing, and robotics enables us to create efficient systems that convince and delight our clients. Our goal is to always support your progress with foresight and sustainability.

## CORE COMPETENCES

### MACHINE VISION

Since the beginning, Compar's main performance is to fulfill all customers requirements in terms of machine vision solutions with PC-based systems or Intelligent cameras. Starts from cost efficient systems to high complex innovative multi camera solutions. We strive for excellence in machine vision & robotics. Always.

### ROBOTICS

The Epson robots portfolio ranges from numerous SCARA variants to 6-axis robots - up to 450 different models. Also, Epson is the world leader for SCARA robots, and Compar is the official distributor for Switzerland and the Principality of Liechtenstein.

### AUTOMATION

The bundled system consisting of machine vision hardware and software, feeding unit, and/or robot is flexible and acts as a single component - ideal for simple integration. For end customers we also supply complete autonomous test cells.

## MAIN PRODUCTS

Machine Vision Solution

Intelligent Cameras

Industrial Robots

Autonomous Inspection System

Systems for Machine Builders

## MAIN EXPERTISE

Measurement

3D Inspection

Print Inspection

Solder Inspection

Surface / Cosmetic Inspection

Lens Inspection

Assembly Inspection

Code Reading / Track & Trace

Robot Guidance / Bin Picking

Deep Learning

X-Ray

Studies / Analyses
